PROFILE SUMMARY

Analytical and results-oriented **Transformation Manager @ TCS** with **2.5+ years of overall experience** connecting business processes with enterprise technology. Experienced in enterprise ERP implementation across **Manufacturing workflows (Bill of Materials / BOM, Procure-to-Pay / P2P, Order-to-Cash / O2C)** and **HRMS & Payroll operations**. Skilled in requirement elicitation, AS-IS / TO-BE process mapping, client operational advisory, **Atlassian Jira** sprint & defect tracking, **Frontend screen testing**, and **Postman API testing** across multiple environments. Blends software foundations with strong functional consulting and client enablement.

TECHNICAL SKILLS

- **Business Analysis & Consulting:** Requirement Gathering, Client Communication, Workflow Understanding, Process Mapping, BRD/FRD, Solution Planning.
- **ERP & Business Processes:** Manufacturing, BOM, Inventory, Procurement (P2P), Sales (O2C), HRMS, Payroll, ERP Demonstrations.
- **API Testing & Quality Assurance:** Postman, REST APIs, JSON, Functional Testing, Bug Tracking, UAT, API Validation.
- **Project Management & Tools:** Agile, Sprint Planning, Task Management, Jira, Confluence, Excel, Client Coordination.
- **AI-Assisted Development & Deployment:** React.js, Next.js, Python, Django, PostgreSQL, MySQL, AWS, Linux VPS, Nginx, GitHub.

WORK EXPERIENCE

Tata Consultancy Services (TCS iON), Pune | Mar 2026 – Present

Transformation Manager

- **Client Requirement Gathering & Process Mapping:** Interfacing directly with manufacturing client leads to gather functional requirements, translate shop-floor operations into ERP module configurations, and eliminate operational bottlenecks.
- **Manufacturing ERP Core Module Enablement:** Facilitated master data standardization and module configuration across Production Engineering & Bill of Materials (BOM), Procure-to-Pay (P2P), and Order-to-Cash (O2C) operational cycles.
- **Postman API Testing:** Conducting API testing using Postman, setting up environment/collection variables, validating JSON request payloads, and verifying API response status codes.
- **Client Enablement & Training:** Conducting hands-on user enablement sessions, guiding client department leads through master data setups, BOM configurations, and end-to-end operational ERP workflows.

IMR Tech Solutions (Parent: Introspective Market Research), Pune | Feb 2024 – Nov 2025
Full Stack Developer & Technical Team Lead

- **IT Division Establishment & Project Management:** Promoted to full-time after a 5-month internship as the first IT hire, leading client acquisition, project planning, quotations, technology selection, and end-to-end delivery.
- **Requirements Analysis & Client Advisory:** Owned project lifecycles from requirement gathering and task estimation to technical architecture, advising clients on functional feature specifications and implementation feasibility.
- **Agile Delivery & Sprint Management:** Managed agile sprint roadmaps, task distribution, and issue resolution in Atlassian Jira; conducted code reviews and coordinated production releases.
- **Multi-Tenant SaaS Platform Delivery:** Engineered and deployed scalable multi-tenant SaaS products (Django REST, React, PostgreSQL) on cloud VPS environments with Nginx reverse proxies and SSL automation.
- **System Documentation & Testing:** Authored system architecture blueprints, user journeys, and technical documentation; validated API endpoints and performed screen testing before client demonstrations.

ZeroVaaga Technologies, Kolhapur | Dec 2022 – Jan 2023
Web Developer Intern

- **Web Development & CMS:** Gained hands-on experience with PHP and ProcessWire CMS by developing and maintaining live projects.
- **Debugging & Feature Development:** Debugged existing code, resolved issues, and implemented new website pages and interactive features.
- **UI/UX Design & Digital Tools:** Worked with Figma, Canva, and Microsoft 365 for interface design, digital assets, and team collaboration.
- **System Architecture & Technical Learning:** Gained foundational knowledge of system architecture, application workflows, and real-world software development practices.

FREELANCE CASE STUDIES

Maharashtra Municipal Portals | Subdomains (district).maharashtramunicipal.cloud
Stack: Vite (React.js), Django REST Framework, PostgreSQL, AWS EC2, and S3.

- **Government Project Delivery:** Developed and deployed government-approved property survey and tax portals across 5+ subdistricts, serving 50,000+ citizens.
- **PDF Automation:** Built a bulk PDF generation system using Redis and Celery for tax receipts, property records, and survey reports.
- **System Reliability:** Managed automated backups, recovery, monitoring, and server availability for smooth municipal operations.
- **Project & Team Management:** Planned projects, guided junior developers, assigned tasks, and worked with government clients to improve features and workflows.
- **AWS & Deployment Automation:** Managed AWS servers, optimized costs, and automated testing, builds, migrations, and deployments using GitHub Actions.

TalentHub Consultant | talenthubconsultant.com

Stack: Next.js, Django REST Framework, PostgreSQL, Hostinger.

- **End-to-End Project Delivery:** Independently planned, developed, and deployed TalentHub Consultant, a recruitment platform connecting job seekers with employers.
 - **Features & Testing:** Implemented candidate registration, job listings, application tracking, and recruiter workflows with functional testing.
 - **Content & CMS Management:** Managed the complete CMS, created website content, articles, and blogs, and maintained pages and job listings.
 - **SEO & Performance:** Managed XML sitemaps, Google Analytics, Search Console, Google Business Profile, and PageSpeed optimization.
-

EDUCATION

- Chhatrapati Shahu Institute of Business Education & Research, Kolhapur | Dec 2021 – Nov 2023
Master of Computer Applications (MCA)
 - Smt. Kasturbai Walchand College, Sangli | July 2018 – April 2021
Bachelor of Computer Science (BCS)
-

SOFT SKILLS

- Understanding Client Needs & Workflows
 - Problem Solving & Debugging
 - Exploring New Technologies & Tools
 - Quick Learning & Adaptability
 - Functional & Technical Understanding
 - Project Planning & Management
 - Client Communication & Coordination
 - Finding Practical Solutions
-

CERTIFICATION

- Envision Computer Training Institute, Pune | Jan 2024 – Jul 2024
Full Stack Java Certification
